GRUNDFOS 

Possibility in every drop

CONTENTS

GROUNDWATER SUBMERSIBLES:

WATER SYSTEMS PUMPS, CONSTANT PRESSURE, MOTORS & CONTROLS

SUBMERSIBLE PUMP UNITS:

SQ - 3" and Larger Wells.....	1
SQE, SmartFlo - 3" and Larger Wells.....	2
CUE and TCI VFD Drives.....	3
CUE 100 Packages, CUE 100 and SmartFlow Drives.....	5
SP - 4" and Larger Wells.....	6
SP - 6" and Larger Wells.....	16
SP - 8" and Larger Wells.....	26
SP - 10" and Larger Wells.....	28
SPE - 6", 8", and 10" Wells.....	30

SUBERSIBLE PUMP ENDS:

SP - 4" Pump Ends.....	31
SP - 6" Pump Ends.....	35
SP - 8" Pump Ends.....	39
SP - 10" Pump Ends.....	40
SPE - 6", 8", and 10" Pump Ends.....	42

MS, MMS SUBMERSIBLE MOTORS:

4" Motors.....	43
6" Motors.....	44
8" and 10" Motors and Replacement Motor Leads.....	45
3-Wire Control Boxes.....	46
Motor Nut/Bolt Kits.....	47

PRICES: Effective in USA ONLY and subject to change without notice

SUBMERSIBLE MOTOR PROTECTION:

MP204 - Relay Controller and Motor Protection.....	48
CIM and CIU Modules.....	49
Level Detection Devices.....	50
GRM.....	51
LC241 - Mod Control Panel.....	52
SQE Accessories.....	53
Jet Pumps.....	54
Scala1 and Scala2 Pumps and Accessories.....	55
CMBE Centrifugal Booster.....	56
Multi-B.....	57
Multi-E CRE 3-5-10 P-SW.....	58
Multi-E CRE 15-20 P-SW.....	59
Multi-E CRE 3-5-10 PT.....	60
Multi-E CRE 15-20 PT.....	61
Unilift Wastewater.....	62
SP Pump Testing.....	63

CU301 / SmartFlo / CUE Pressure Transducer 0-120 PSI, 1/2" NPT						92506685		\$273.00	

* Purchase a "CUE KIT" to meet NEMA 1 standards. CUE KIT material numbers and List prices are provided above.

** The NEMA 12 CUE's have a backplate and disconnect switch

BOLD Sine-wave filters are IP23 and not UL Listed.

The CUE is engineered specifically for Grundfos pumps only.

Please use Grundfos EXTRANET to verify pricing and check product lead times.

NOTES:Pump End (BP) = PEI_{CL} .85, Complete with Motor (PM) = PEI_{CL} .87, with CUE (Controller) = PEI_{VL} .54, 2-Pole, 3/4HP out of regulation scope.

* Control box required for 3-wire single phase motors and applications.

* 1/2HP, 3/4HP and 1HP control boxes sold in 10-Pack quantities. Order in multiples of 10 quantity.

Complete pump DOES NOT include control box. Control box sold separately.

Prices DO NOT include magnetic starters for 3-wire, three-phase complete units.

PRICES: (In U.S. \$) Effective only in the USA and are subject to change without notice.

Please use Grundfos EXTRANET to verify pricing and check product lead times.

NOTES:Pump End (BP) = PEI_{CL} .84, Complete with Motor (PM) = PEI_{CL} .84, with CUE (Controller) = PEI_{VL} .54, 2-Pole.

* Control box required for 3-wire single phase motors and applications.

* 1/2HP, 3/4HP and 1HP control boxes sold in 10-Pack quantities. Order in multiples of 10 quantity.

Complete pump DOES NOT include control box. Control box sold separately.

Prices DO NOT include magnetic starters for 3-wire, three-phase complete units.

PRICES: (In U.S. \$) Effective only in the USA and are subject to change without notice.

Please use Grundfos EXTRANET to verify pricing and check product lead times.

NOTES:

* DOE Complete with Motor (PM) = PEICL 0.85, With CUE (Controller) = PEIVL 0.33 10HP - 0.32 25HP, 4-Pole.

* Control box required for 3-wire single phase motors and applications.

Complete pump DOES NOT include control box. Control box sold separately.

Prices DO NOT include magnetic starters for 3-wire, three-phase complete units.

PRICES: (In U.S. \$) Effective only in the USA and are subject to change without notice.

Please use Grundfos EXTRANET to verify pricing and check product lead times.

NOTES:Pump End (BP) = PEI_{CL} .92, Complete with Motor (PM) = PEI_{CL} .92, with CUE (Controller) = PEI_{VL} .53, 2-Pole.

* Control box required for 3-wire single phase motors and applications.

* 1/2HP, 3/4HP and 1HP control boxes sold in 10-Pack quantities. Order in multiples of 10 quantity.

Complete pump DOES NOT include control box. Control box sold separately.

Prices DO NOT include magnetic starters for 3-wire, three-phase complete units.

PRICES: (In U.S. \$) Effective only in the USA and are subject to change without notice.

Please use Grundfos EXTRANET to verify pricing and check product lead times.

6" 90S Through 1100S SPE Pumps, CUE VFD Drives, and TCI Sine Wave Filters

Permanent Magnet Motor requires IPM technology to start motor, found in Grundfos CUE VFD Drives.

Overall 10% electrical energy savings operation on a Grundfos CUE Drive.

5-Year Warranty when purchase complete system including SPE Complete Pump and CUE Drive.

Motors are 4-Pole, 3600 RPM, 3PH, 460 Volt, Operating on 410V

cCSAUS & NSF 61 AND NSF 372 drinking water approvals

SCALA2

GRUNDFOS SCALA2 is a fully integrated water booster pump delivering perfect water pressure to all taps. It features pump, motor, tank, sensor, drive and non-return valve in one compact unit that installs quickly and easily.

With its intelligent pump control, SCALA2 adjusts performance to any demand – and with its water-cooled motor, it offers one of the lowest noise levels in its class. The result is maximum comfort with minimum effort.

Key features

- Intelligent pump control
- Water-cooled, permanent magnet motor
- Dry running protection
- Self-priming
- User friendly control panel
- Outdoor-ready
- Easy sizing and selection

Pump Tests to be separate line item on purchase order.

TEST TYPE	NET PRICE	PUMP TYPE
Verified Performance Test	\$720	SP
Witnessed Verified Performance Test	\$970	SP

Notes

1. For pump types not listed consult factory.
2. Extra delivery time will normally be required.
3. A test report will be shipped with the pump.
4. Pumps are tested in accordance to manufacture specifications in Fresno CA.
5. Pumps are tested in accordance to ISO 9906: 2012 Grade 3B are tested in Denmark requiring much longer lead times. Consult factory for lead time.
6. Vibration test is in accordance with ISO 10816 are tested in Denmark requiring much longer lead times. Consult factory for lead time.

STANDARD FACTORY PUMP PERFORMANCE TESTS

The Grundfos factory tests virtually every pump for proper performance during the production process and there are only very rare exceptions to this rule (e.g. 50Hz submersible pumps, which requires an additional cost). The factory uses calibrated measurement equipment to perform the tests, and both Grundfos New SP pumps testing procedures in Fresno CA, is performed to manufacturing standards. The ISO 9006 test procedures are strictly followed in Denmark only. Consult factory for lead time regarding ISO 9906 testing in Denmark. Pump performance is typically measured at two or three pre-defined flow points(gpm) throughout the performance range of the pump, and the resulting total dynamic head (feet), voltage (Volts) and current (Amperes) for each flow point is measured. The test criterion is 'pass/fail' and the actual test values are not documented or provided with the purchase of the pump. If actual test values need to be documented for a specific pump, a verified pump performance test is required. The standard factory pump performance test is performed on every pump on the production line and is included free with the purchase of the pump (no additional charge). Used/installed SP pumps can not be tested.

VERIFIED NEW / UNINSTALLED PUMP PERFORMANCE TESTS (PERFORMED AT THE FACTORY)

The Grundfos factory will conduct a verified performance test to measure and document the performance of a specific pump. The factory uses calibrated measurement equipment to perform the tests.

Pump performance is measured at a minimum of five flow points (gpm) throughout the operating range of the pump, and the resulting total dynamic head (feet), voltage (Volts) and current (Amperes) at each flow point is measured and recorded. The results are documented in a test report and forwarded to the appropriate contact person of the company purchasing the pump. A verified test number is engraved or stamped on or near the pump nameplate, and this number will also appear on the test report. Please note that the factory will only conduct a verified pump performance test on SP PUMP ENDS ONLY (pumps (pumps without motors). If a verified test is required on a pump end only, the test will need to be accomplished through the Grundfos Service Department.

SP pump ends only test results are with a test motor and install site performance may vary from the verified test values as the install site has a different motor.

Verified tests requests should be made at the time of order of new product as a unique material number is generated for verified tested pumps.

Charges only apply to products which have not yet shipped and the verified test are requested at time order is placed.

VERIFIED PUMP PERFORMANCE TESTS (THROUGH THE SERVICE DEPARTMENT)

Grundfos Service Department can also perform verified pump performance. These tests are typically done on pumps that are in the Service Department for repair or modifications, but can also be done on new pumps (such as pump ends) through the 'Interspeed' Program. The Service Department uses calibrated measurement equipment to perform the tests and both Grundfos Pumps and ISO test procedures are strictly followed. Pump performance is measured at a minimum of five flow points (gpm) throughout the operating range of the pump, and the resulting total dynamic head (feet), voltage (Volts) and current (Amperes) at each flow point is measured and recorded. The results are documented in a test report and forwarded to the appropriate contact person of the company purchasing the pump. A verified test number is engraved or stamped on or near the pump nameplate, and this number will also appear on the test report.

WITNESSED VERIFIED PUMP PERFORMANCE TEST

A representative of the company purchasing the pump physically goes to the Grundfos factory or Service Department to witness the test.

HYDROSTATIC TEST

The Grundfos factory will perform a static pressure test and document the results for a specific pump. The pump is filled with water and pressurized to 1.5 times (1.1 times for pumps with thermoset parts) the published maximum working pressure, and the pump is not in operation during this test. The pressure will be maintained for ten minutes with no material defects or leakage (slight leakage around the mechanical seal is acceptable). The results are documented in a test report and forwarded to the appropriate contact person of the company purchasing the pump. A hydrostatic test number will be engraved or stamped on or near the pump nameplate and this number will appear on the test report. Please note that hydrostatic tests are not available for submersible pumps.
